STRAPPING
WRAPPING
CODING
TAPING

The QPWM plastic strap dispenser from Cyklop is an affordable strap dispenser. The dispenser is equipped with a brake system so that the strap does not continue to roll. The strapping band is easy to replace and other core diameters than the standard 406 mm core can also be placed on the dispenser. The QPWM has a storage compartment for handheld devices and seals. This makes this the basis for a completely mobile solution for strapping with plastic strap.

Advantages

- For PP and PET strap
- Core diameter 200/280/406 mm
- Suitable for strap width 9-19 mm
- Strap brake system
- Storage compartment
- Metal discs for extra durability
- Ergonomic, easy to move with one hand
